**Introduction:** Here is the outline for this introduction. We will discuss the underlying message of this course, our presuppositions, and touch on cultural issues. Part six of the introduction gives proper credit to a number of sources used in the preparation of this seminar. Next I will share some personal information. Then we'll talk about the class itself: the values that will govern our time together, how the class will be administered, course grading, awards and prizes, etc. Finally, we will preview the special project that we will do as a class.

# 1. Course overview

---

## Objective

- **Examine Biblical teaching about money in order to align our heart with God's, enabling us to love God and live righteously in the financial area of our lives**

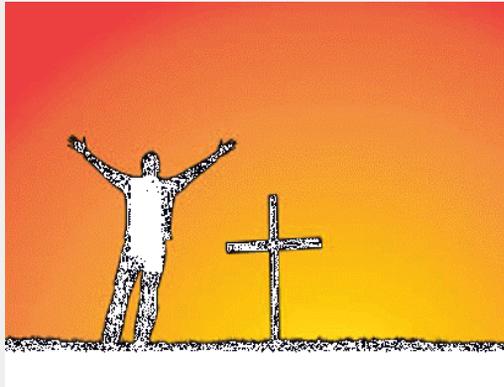

**2. Course overview:** Let's now consider the scope of this course from 10,000 meters, or a high-level. This course is about more than just passing along information. Our primary objective is to change our hearts by examining what the Bible has to say about money and wealth. We want to let that information penetrate into our hearts so that we may align them with God's heart. If our hearts are aligned with his, it will enable us to please him with the financial decisions we make as we go through life. Thus, the position of this course is shown in the clip art: if we let Scripture inform us regarding God's desires for our finances, and let it penetrate our hearts, it will help us make righteous decisions in the financial area of life, both tactically and strategically.

## 2. Underlying message of this seminar

---

### God wants our heart

- **The purpose of my instruction is that all believers would be filled with love that comes from a pure heart, a clear conscience, and genuine faith. 1 Timothy 1:5 (NLT)**

The underlying theme of this seminar is a change of heart based on understanding of Biblical truth. As we make righteous decisions, our consciences will be clear. And our attitudes and behavior will be an indication of authentic faith. Let's read our theme verse together, as we will at the beginning of each of the 10 principles we will be studying later. A

## From mind to heart

---

*Transformation of the heart begins with the renewing of the mind* (RC Sproul, *The Truth Project*, tour #1)

**From mind to heart:** The late Dr. R. C. Sproul said it well: the transformation of the heart begins with the renewing of the mind. Therefore, I hope that we will be engaging our minds in our study with the intention of internalizing what we learn in such that it becomes a part of who we are at our core.

### 3. Presuppositions

---

- As followers of Christ and students of the Word of God, you are practicing many, if not all, of the principles contained in this seminar and, therefore, you may already be familiar with them
- Though these principles are developed from an inductive “survey” of Scripture and are intended to be faithful to its teaching, the included Bible references permit further in-depth investigation, criticism, discussion, and content improvement in order to be increasingly more faithful to the Word of God
- By assembling them into one comprehensive framework, my hope is that these principles will be a useful body of knowledge for your personal application as well as a resource for teaching others

**4. Presuppositions:** Here are this seminar’s presuppositions:

1. I know that many, if not all of you, are already practicing many of the principles we will be studying. Therefore, I’m hoping that you will share your insights with the class during our time together, based on your familiarity with these topics.
2. The second presumption is that what we learn through our inductive study and the subsequent presentation of the principles will be faithful to God’s Word. However, I realize that there may be some disagreement or alternative views to those presented. Therefore the student is encouraged to do further research and study

in order to more closely conform this content to the truth of Scripture. To help with that goal, some of the passages that apply to each point are listed for easy reference and future study.

3. By assembling the information in Scripture into a body of knowledge, my presumption is that this will provide a framework for personal application of the principles as well as a tool for teaching others.

## 4. Cultural issues

---

**We recognize that social, economic, political and religious customs vary from culture to culture. Therefore, it is not our purpose to dogmatically assert a biased Western perspective of financial principles on the student, but rather to work together to:**

- a) examine basic Biblical teaching about money**
- b) extract basic principles from this teaching using the inductive study method, then**
- c) develop practical life applications of those principles which are culturally independent and universally true -->**

**5. Cultural issues:** I wanted to talk about cultural issues briefly. I realize I come into this classroom as a westerner with western values and culture. I would not dare presume to overlay my values and culture on you. In order to avoid doing that, my intent is to study the Scriptures involved for their meaning and interpretation, extract basic principles from the interpretation, then apply them in ways that are culturally and personally appropriate.
